FEAST OF THE ASCENSION

"BEHOLD, I AM WITH YOU ALWAYS,
UNTIL THE END OF THE AGE."

On Thursday of this week, we celebrated the Feast of the Ascension with a mass.

Fr Clive gave mass with Prince William, who was visiting from Nigeria, playing the piano.

St Mary's Priory Catholic Infant and Junior Schools' Weekly Newsletter

19th May, 2023

'Love one another; Always do our best; Take care of ourselves and the world around us'

When:	What:	Who:	Where:	Time:
29th May- 2nd June	School closed for may half term	All pupils		
Summer 2	Parents invited to visit a lesson	All classes	Classrooms	See email from teachers for more details
8th and 12th June	St Thomas More Catholic School Open Morning	Year 5 pupils	St Thomas More Catholic School	9.30-10.30am
wb 17th July	Year 6 performance of High School Musical- More information to follow		Junior Hall	

Reminders/ Notices

- Summer uniform may now be worn when the weather is nice. Make sure to apply sun cream to your child and provide a hat on sunny days.
- School uniforms- please make sure your child wears their tie (Juniors/optional for Infants), a white shirt (no polo t-shirts) and black shoes (no trainers).
- Follow us on Twitter! @stmarysrcpriory to see weekly updates from our classes!

Stars of the Week

Owl Class	David	Sebastian
Robin Class	Angelo	Jess-Andrea
Swan Class	Terry	Briana
Woodpecker Class	Daniel	Maariya
Dove Class	Mia	Daniel
3N	Ashley	Simon
3M	Caleb	Eliana
4B	Alex	Tatiana
4M	Adonai	Lucia
5C	Fabiana	Mikhaile
5J	Scarlett	Valentina
6B	Josue	Alyssa
6D	Jayden	Laursai

Congratulations to our Stars of the week!
These pupils have worked exceptionally
hard to stand out amongst their peers. Well
done everyone!

19th May, 2023

'Love one another; Always do our best; Take care of ourselves and the world around us'

Keeping Safe

Mobile phones

We recognise the need for use of mobile phones as a safety measure for our children in Year 5 and 6, who walk to and from school alone. To ensure safe management of these devices, these practices are in place:

- Mobile phones are prohibited in classes.
- Mobile phones are seen as a safety measure only for children, in Year 5 and 6, who walk to and from school alone.
- Only children in Year 5 and 6 children who walk to and from school alone can bring a mobile phone into school.
- Mobile phones are kept in a locked cupboard in the classroom.
- Mobile phones are distributed to 'home alone' children, as they leave the school premises.

Please support our work by ensuring your child only brings their phone to school on a day they are walking home alone. Ensure you speak to them about the importance of handing in their phone and it remaining off until they leave the school site. Should you have an arrangement with your child whereby they contact you before leaving school, we shall of course support this.

Thank you for your support.

Link to our Twitter:

<https://twitter.com/StMarysRCPriory>

What's been happening at St Mary's this week?

Make sure you check out our school's Twitter account to keep up to date with what our pupils are getting up to!

6D are investigating how the size of the shadow changes as the distance from the light source increases or decreases.

4B gymnastic session.

6D had a wonderful time singing with Mr Daniel and his accordion.

Are you good on camera?
Can you remember lines?
Do you love performing?!

.....

Ten Ten Resources is looking
for presenters aged 9-12 to **STAR**
in an exciting new project!

Filming will take place in Yorkshire during weekends
in late June/early July.

Transport and accommodation (where necessary) will be provided
for presenters and an accompanying adult.

Filming day/s will be busy, but a great experience!

Think you've got what it takes?! Apply now!

Applications close at 5pm on Friday 26th May

Scan Me!

Resources

We use Ten Ten for our PSHE lessons
at St Mary's.

KIDS

HOLIDAY

CAMP

29th MAY – 1st JUNE
9.30AM – 3PM
AT PRIORY PARK

ABOUT US

Our holiday camps are full of energy containing a variety of games and activities that children can't help but engage in and enjoy. At Sam's Sports Solutions We encourage active participation and healthy competition within the different age groups that the children are grouped into. All activities are specifically chosen to turn up the fun whilst giving all involved a chance to learn new skills, make new friends, and build confidence within themselves and each other.

Promotional offers

- Full week (4 days) - £95.00
- Sibling package (per day) - £40.00
(for two children)
- Sibling package (4 days) - £150.00
(for two children)

£25

PER DAY PER CHILD
AGE 4 - 11

*Payments are
non-refundable
should your child
miss a session.

What Parents & Carers Need to Know about

WIZZ

AGE RESTRICTION
12+

12+ App Store
Teen Google Playstore

Wizz is a networking app which allows users to connect and chat with other people around the world. Its principle is similar to a dating platform: users have a profile with up to three photos, along with optional interests and hobbies tags. This allows other like-minded people to be recommended in searches. If a user likes what they see on someone's profile, they can initiate conversation through the instant message feature; otherwise they swipe on. The app does use age verification technology when an account is created and groups users by age.

WHAT ARE THE RISKS?

OVER-SHARING

Immediately after setting up an account, users start receiving friend requests (mainly from the opposite gender). For many young people, this will be exciting and a boost to their confidence. As young people tend to be more trusting online and may believe what others tell them, however, this can lull them into dropping their guard and revealing personal information to strangers.

CATFISHING AND PREDATORS

Wizz uses Yoti, a digital ID system, to verify users' age. The AI only detects approximate age, though – so an older person who looks younger could be grouped with teens (or vice versa). Also, profile pics on Wizz don't have to match the face of the person who did the initial age verification: it would be fairly easy to create a fake account using another person's photos with a made-up name and age.

EXPLICIT CONTENT

During our research, conversations on Wizz very quickly turned sexual. Users frequently suggested 'taking it to Snap' (Snapchat's disappearing image feature can make it conducive to sharing explicit selfies), connecting on other social media platforms, swapping nude or semi-nude pictures, or holding sexual chats. These users created an impression of the platform being sleazy and unsafe for young people.

18

MEET STRANGERS

INTIMATE IMAGES

It's not unheard of for young people to be coaxed into sending suggestive images of themselves over apps of this kind. Given that Wizz connects users with strangers, who may not be honest about their real intentions, a teenager might conceivably be persuaded to share sexually suggestive selfies by someone who they believed they had a trusting relationship with.

NO PARENTAL CONTROLS

The app claims to provide a secure and inclusive environment, but our researcher couldn't find any parental controls or safety features in evidence. If you report another user for inappropriate behaviour, you are offered the option to block them – but there's no indication as to whether the block has actually been successful, and there was no follow-up contact from the developers.

SECRETS AND SUBSCRIPTIONS

Wizz sent our researcher occasional 'mystery' friend requests from a blurred-out profile. To discover the sender's identity, users can either watch a video (usually an ad for a game or app) or take out a monthly subscription. Cynics might suggest this could be a way to exploit young people's curiosity into making them pay for the app, and that the 'secret admirers' are bots rather than real people.

Advice for Parents & Carers

TALK IT OUT

If your child has downloaded Wizz, talk to them about why they like it and who've chatted with. Have they shared any personal details with this person or connected with them on other social media platforms? Refresh your child's memory of the various risks that can arise from engaging with strangers online and get them to consider using a similar app with more robust safety features.

EMPHASISE CAUTION

Young people are far more inclined to see the good in others; they often overlook the fact that scammers set up fake accounts on apps like this with the intention of getting money or personal data. Remind them that not everyone online is who they claim to be, how easy it is for someone to create a bogus profile, and why it's vital to think twice about sharing anything on networking apps.

BE SUPPORTIVE

When connecting with strangers on apps like Wizz, seemingly innocent chats can quickly progress to become sexually explicit and lead to nudes being sent. Make sure your child knows to come to you if they're uncomfortable about anything they've been sent or been asked to send. If they've already shared something that they now regret, reassure them that you'll support them no matter what.

KEEP THINGS TRANSPARENT

It might feel awkward, but regular chats about your child's online life can be beneficial. If they seem suddenly anxious or secretive around their phone or tablet, they may have something they need to get off their chest. You could also consider not allowing digital devices in their bedroom, especially overnight – that's when a lot of the riskier conversations on apps like Wizz tend to take place.

What Parents & Carers Need to Know about FORTNITE

CHAPTER
4

AGE RESTRICTION
PEGI
12

WHAT ARE THE RISKS?

ALWAYS ONLINE

There's no single-player offline mode in Fortnite: it can only be played online. Internet access can sometimes be an issue when you're out and about (both in terms of connectivity and using up data), so you may find that dedicated young Fortnite players are often less enthusiastic about trips away of a certain length – such as days out and holidays – than you might have expected.

IN-GAME COSTS

Fortnite is free to download and play, but it does offer various additional purchases – cosmetic skins, rare weapons and so on – which don't really impact on gameplay, but can cost quite a significant amount. These items are bought with game's currency, V-Bucks – which can be earned through playing, but are also often purchased from the game's store for real-world money.

POP CULTURE REFERENCES

Part of Fortnite's appeal is its ongoing crossovers with other popular franchises, ranging from movies and TV shows like *The Walking Dead* to comic book characters including Batman to other games such as *Street Fighter*. This means you could find your child asking questions about the creature from *Alien* or who Geralt from *The Witcher* is a little sooner than you'd possibly anticipated.

Fortnite may be something of a veteran in gaming terms (having launched back in 2017), but it remains massively popular – with more than 250 million people playing online every month. That's partially due to the competitive nature of its player-vs-player combat, its pop culture crossovers and its constantly shifting map. Significant updates are rolled out with each new version of the game – known as 'chapters' – and within these sit shorter 'seasons', which bring more subtle changes. The latest iteration, Chapter 4 Season 2, adds a cyberpunk-themed city and anime-style areas, for example, along with new weapons and characters.

CROSSPLAY AND PARTY CHAT

Fortnite is popular with vast numbers of gamers... of various ages. Crossplay lets friends play with and against each other, regardless of whether they're on an Xbox, PlayStation or PC – while party chat allows them to communicate during the game. This chat feature can also, therefore, put youngsters at risk of hearing inappropriate language from older players in the heat of virtual combat.

VIRTUAL VIOLENCE

At its core, there's no avoiding that Fortnite is about shooting other players to eliminate them. That said, there's no blood or gore: the violence is generally rendered in a cartoonish style, and there are frequent comical touches to lighten the mood (fishing mini-games, for example). The machine guns, shotguns and other weapons often look and behave realistically, however, so discretion is advised.

FREQUENT UPDATES

The game's developers release content in 'seasons' that usually run for around ten weeks. Each fresh update sees items added to the in-game store, changes to the environment's map and a different over-arching theme (such as 'medieval', 'pirates' or 'party'). These regular renewals help to hold players' interest – but also give young gamers plenty of reasons to keep returning to their screens.

Advice for Parents & Carers

MATCH GAMING TIMES

Younger players tend to want to play Fortnite alongside their friends. With this in mind, it could be worth speaking to the parents and carers of your child's social group and trying to coordinate their gaming around certain hours of the day. Safety in numbers is obviously a factor here, but it will also help your child feel that they're getting adequate opportunity to socialise with their friends online.

SET SPENDING LIMITS

Fortnite's rotating store is a not-so-subtle mechanism for coaxing players into splashing out on those sought-after items before they disappear again for weeks. This could potentially lead to surprise outlays on your card if your child is tempted into an impulse purchase. You could consider setting up a prepaid card for them to use – or ensuring that any online purchases require adult authorisation.

USE UPDATES AS REWARDS

Fortnite's seasonal updates are free – but each also brings the option of a 'battle pass', unlocking exclusive rewards for playing the game and completing set challenges. The passes cost around £8 (and are available as part of larger bundles) and can be an effective reward to young Fortnite fans for good behaviour or academic performance, or as an incentive for chores like tidying their room.

BE WARY OF SCAMS

The immense popularity of Fortnite with more trusting younger audiences means that there's no shortage of scammers looking to fraudulently obtain passwords and other personal data through techniques like phishing. As the developers point out on many of Fortnite's loading screens, they never ask for a player's account password outside of the game: make sure your child knows this.

ENJOY FORTNITE TOGETHER

Fortnite also offers split-screen gameplay, meaning that two people can play simultaneously via the same TV or computer. That's ideal for siblings or when your child's friends visit – but it also offers you an opportunity to spend time doing something fun with your child, while also being able to make sure they're playing the game safely. Who knows, you might even teach them a thing or two!

Meet Our Expert

#WakeUpWednesday

WHAT ARE THE RISKS?

While some tablets (such as the Amazon Fire Kids editions) come with rugged shock-proof cases, iPads aren't built for rough and tumble. They're also more expensive than most other tablets, and any damage your child's iPad suffers could be costly to repair. Buying a child-friendly case and screen protector for the device could be a wise move, especially if it's being used by younger ones.

Like most digital devices, tablets have the potential to become quite addictive. You might find your child spending too long staring at their iPad, which could lead to irritability, mood swings and a loss of interest in more important tasks. If this happens, be sure to visit the built-in screen time settings and ensure you limit how long they're able to spend on the device each day.

Even if it would never occur to your child to go searching online for age-inappropriate sites, apps or information, there's always a possibility that something unexpected – perhaps a video that auto-plays or content incorrectly suggested by an algorithm – could appear on their tablet and upset them. You can help prevent this by adjusting the content settings (see our 'top tips' section below).

The parental controls built into iOS (the fundamental operating system of Apple devices) enable you to block access to most age-inappropriate content – but your child could potentially still bypass these restrictions (either accidentally or deliberately) by using Siri, Apple's voice-activated digital assistant. To avoid this, toggle the "Ask Siri" functions to "off" in the iPad's settings menu.

Advice for Parents & Carers

Before letting little ones loose on an iPad, it's a good idea to set up Family Sharing, as this lets you utilise the parental controls to manage exactly how your child is able to use the device. You can do this fairly easily by going into the iPad's settings; once there, you'll be able to add an existing Apple account (if your child already has one) or set one up from scratch.

The 'Downtime' function allows you to tell the iPad to lock itself at certain periods (at mealtimes or before bed, for instance), while 'App Limits' removes access to certain apps once they've been used for a specified length of time each day. The iPad can display a reminder when these limits have nearly been reached, letting your child mentally prepare for the end of their gaming or viewing time.

To empower your child with an increased sense of freedom on their device (without giving yourself something else to worry about in the process) you could enable the iPad's 'Ask to Buy' feature. Whenever your child tries to download or buy an app, game or product, the iPad sends you a request to approve (or deny) it. This option only becomes available if you've set up Family Sharing.

The parental controls can stop the iPad from displaying explicit or age-inappropriate content (in apps like iTunes and Safari, for instance) when your child is signed into their account. You'll also be able to restrict the capacity to download and install apps, and you can specify permissions which prevent children from changing the iPad's privacy settings once you've selected them.

Just like the iPhone, Apple's iPads have 'Find My' software to help you locate your child's iPad – or indeed, any linked Apple devices that have gone AWOL, including phones, watches and AirPods. If you enable 'Find My' in the settings menu, it will display the last known location of an iPad that's been mislaid, as well as giving you the option to lock a missing iPad that you suspect has been stolen.

10 WAYS GAMING CAN SUPPORT POSITIVE OUTCOMES in Children and Young People

Gaming, of course, is phenomenally popular with children and young people. In 2021, for instance, more than three-quarters of teenagers played online games, with almost 70% of primary school aged children doing likewise. If enjoyed in moderation and supported by a healthy routine (staying hydrated, good sleep habits, taking breaks and so on), gaming can actually benefit a person's mental health. As long as we stay alert for potential risks, games can be much more than what we see on the surface: they can be a way to socialise, an avenue for creativity and a route to solving problems. Check out our top ten tips on how gaming online can sometimes work to your child's advantage ...

THE FEEL-GOOD FACTOR

Gaming is so popular because at the base level, it's enjoyable for the player. Succeeding in any game or contest releases dopamine in our brains: the 'feel-good' chemical that makes us happy or excited. Those emotions can be incredibly beneficial for mental wellbeing – as long as young players don't become reliant solely on playing video games to make themselves feel happy.

ACHIEVEMENT & PRIDE

A sense of achievement is incredibly important to all of us and can be particularly valuable to someone who's feeling unhappy or distracted. It's easy to get caught up in our thoughts, which can sometimes take a negative turn. So even achieving something small – like finishing a difficult level in a Mario or Sonic game – can feel like conquering Everest and give us renewed optimism.

SOCIAL SALVATION

Gaming can be an incredibly social activity. When playing online with trusted friends, what usually start out as chats specifically about the game can often develop into conversations about school and life. Even if they've had a bad day, simply knowing that a friend is there, on the other end of their headset, can provide young gamers with a sense of security and some welcome laughs.

TEAMWORK MAKES THE DREAM WORK

In many online games, teamwork is crucial to winning. Often, people who are struggling with their mood tend to feel like they fail or let others down a lot. Working as a team with trusted friends or family in a game can reinforce a young person's self-importance: striving for a common goal and succeeding together can remind them that they're an integral part of something bigger.

REAL-WORLD RELATABILITY

Because many major releases are shooting or action games, when some people hear "gaming" they think of guns, explosions and violence. What's less recognised is how many titles explore relatable issues such as overcoming anxiety or coping with grief. These games allow young players to understand their emotions more deeply and realise they aren't alone in how they might be feeling.

A DIGITAL COMFORT

Video games can provide a reliable constant. No matter what happens in school or between friends, playing a favourite game is something that youngsters can look forward to all day and can help them de-stress. Let's not forget, games are fun – and, when approached safely, an interactive activity in which the player has a degree of control over what happens next can feel immensely reassuring.

PROBLEM-SOLVING PRACTICE

It can be difficult for young people to handle the feeling that nothing is going right or that their problems are insurmountable. Gaming can help alleviate that by presenting challenges to be overcome, either solo or alongside trusted friends. Defeating a powerful monster or solving a tricky puzzle reminds young gamers that even the most daunting obstacles can be faced and conquered.

THE GREAT ESCAPISM

A certain amount of escapism is fabulous – allowing us to temporarily park some stress while exploring a world other than our own. For children, gaming can be like reading a novel or watching a film: a moment in the day when the fantastical becomes real, firing their imagination and immersing them in a story. Who wouldn't want to venture to the stars? Or battle monsters to save the planet?

TRIED & TRUSTED

There can be reassurance in repeating tasks. It often promotes a controlled outcome, which is ideal when life feels overwhelming or out of control. Replicating an experience, such as playing the same level of a game over and over to perfection, gives the player a sense of control and familiarity: it's like listening to a favourite song that always makes you feel happy or confident.

ENCOURAGING CREATIVITY

Inventiveness is a huge part of many modern games: in Minecraft and Roblox, for example, players regularly dream up amazing structures or new ways to play. Using our imagination to create something (whether digitally or physically) is massively beneficial for the brain: that's why Lego is sometimes used in the medical sector as both a stress reliever and a brain injury rehabilitation tool.

Meet Our Expert

Tips for Encouraging Open Discussions about DIGITAL LIVES

The online world is an entirely familiar and commonplace part of life for today's children and young people, far more so than for previous generations. There are many positives to children being able to access online materials, so it's important not to demonise the internet, games and apps, and limit the benefit of their positive aspects. At the same time, we do have a responsibility to educate children about the hazards they may encounter online (just as we would about real-world dangers) so it's essential that we don't shy away from talking to them about the complex – and often sensitive – subject of what they do and what they see when they're online.

Here are some suggestions for kicking off conversations with your child about their digital life...

MAKE YOUR INTEREST CLEAR

Showing enthusiasm when you broach the subject signals to your child that you're keen to learn about the positives of their online world. Most children enjoy educating adults and will happily chat about what they use the internet for, or what games and apps they're into, and how these work. Asking to see their favourite games and apps in action could help you spot any aspects that may need your attention – such as chat functions which might require a settings adjustment to limit contact with strangers. Keep listening even if your child pauses for a long time: they could be considering how to phrase something specific, or they may be gauging your reaction.

BE OPEN AND HONEST, APPROPRIATE TO THEIR AGE

At various stages, children and young people become curious about puberty and how their body changes; about relationships; about how babies are made; and about sexual health. If your child knows that they can discuss these sensitive subjects with you, they tend to be less likely to go looking online for answers – which can often provide them with misleading information and, in some cases, lead to them consuming harmful content. Don't worry if you don't immediately know the answers to their questions – just find out for yourself and go back to them once you have the facts.

REMIND YOUR CHILD THEY CAN ALWAYS TALK TO YOU

In my role I work with many children and young people who admit being reluctant to tell a trusted adult about harmful content they've viewed online, in case it leads to having their devices confiscated. Emphasise to your child that you're always there to listen and help; reassure them that if they do view harmful content, then they are not to blame – but talking about it openly will help. Children shouldn't be expected to be resilient against abuse or feel that it's their job to prevent it.

KEEP TALKING!

The most valuable advice we can give is to keep talking with your child about their digital lives. You could try using everyday situations to ask questions about their online experiences.

DISCUSS THAT NOT EVERYTHING WE SEE ONLINE IS REAL

Here, you could give examples from your own digital life of the online world versus reality – for example, those Instagram posts which show the perfect house: spotlessly clean, never messy and immaculately decorated. Explain to your child that there are many other aspects of the online world which are also deliberately presented in an unrealistic way for effect – such as someone's relationship, their body, having perfect skin and so on.

TRY TO REMAIN CALM

As much as possible, try to stay calm even if your child tells you about an online experience that makes you feel angry or fearful. Our immediate emotions frequently influence the way we talk, so it's possible that your initial reaction as a parent or carer could deter a child from speaking openly about what they've seen. Give yourself time to consider the right approach, and perhaps speak with other family members or school staff while you are considering your next steps.

CREATE A 'FAMILY AGREEMENT'

Involving your whole household in coming up with a family agreement about device use can be immensely beneficial. You could discuss when (and for how long) it's OK to use phones, tablets, consoles and so on at home; what parental controls are for and why they're important; and why it's good to talk to each other about things we've seen or experienced online (both good and bad). Explaining your reasoning will help children to understand that, as trusted adults, we want to make sure they are well informed and kept safe. Allowing children to have their say when coming up with your family agreement also makes them far more likely to stick to it in the long term.

What Parents & Carers Need to Know about TWITTER

WHAT ARE THE RISKS?

Twitter is a social media network which allows users to post short messages ('tweets') of up to 280 characters. Tweets can consist of text, photos, videos, audio, links, polls and GIFs – often linked by hashtags if they share a common theme or message. Hashtags receiving high levels of interest are said to be 'trending'. Twitter users can engage with other people's posts by liking, retweeting (sharing) or tweeting back (commenting on). Since the entrepreneur Elon Musk acquired Twitter in October 2022 for \$44 billion, he has implemented several major changes to the platform.

AGE RESTRICTION
13+

INTERACTION WITH STRANGERS

Tweets are public by default, meaning that anyone can view and interact with posts, follow someone and send direct messages. The concern here is that young people may therefore connect and communicate with strangers. Some individuals may follow a young person's Twitter account simply because they have similar interests; however, others may turn out to have more sinister intentions.

FIXATION ON VIEW COUNT

Twitter has recently introduced a 'view count' feature – telling users how many people have seen their tweet (even if they haven't reacted to it). Previous research has found that unfavourable comparisons with other social media users can cause young people to experience feelings of insecurity, jealousy and low self-esteem – leading to an obsession with increasing their numbers.

TROLLS AND BULLYING

The anonymity offered by fake profiles encourages some users to send tweets designed to provoke a reaction; to disrupt conversations; to spark an argument; or to harass the recipient. Such trolling and bullying can impact the mental wellbeing of both the target and anyone who witnesses it. Encourage your child to come to you if they experience such behaviour on Twitter, or if they see it taking place.

PAID-FOR VERIFICATION

Previously, if a Twitter profile displayed a blue tick icon, it meant that the owner – usually a celebrity or a major organisation – had been verified as genuine. Now, however, anyone can pay for a Twitter Blue subscription to receive the tick, with the platform carrying out limited checks on the account's authenticity. This could easily lead to more fake accounts impersonating real people or companies.

CONTENT MODERATION CHANGES

In late 2022, Twitter stated that their 'policy enforcement will rely more heavily on de-amplification of violative content: freedom of speech, but not freedom of reach'. No policies have changed yet, but this wording suggests they may limit who can see posts rather than removing them. While supporting free speech, this could encourage an environment where some toxic content remains online.

HIJACKED HASHTAGS

The hashtag (#) is one of Twitter's most recognisable facets, allowing users to find specific trends or topics. But the sheer volume of tweets each hour can rapidly distort a hashtag's meaning: an initially innocent search term can quickly end up returning inappropriate results. This is common with 'trending' hashtags, as people know that using them will get their tweet seen by a larger audience.

Advice for Parents & Carers

SET ACCOUNTS TO PRIVATE

To reduce some of the fear of your child's tweets being seen and shared by anyone, you can always make their account protected. This means that your child has to give approval for another user to view their posts. You can change Twitter's privacy settings so that your child can't be messaged directly by other people on the platform and their geographical location won't be shared.

EXPLORE THE NEW SETTINGS

Previously, any user could reply to anyone else's tweets. However, the new conversation settings let your child determine who can reply to their posts – either by selecting everyone (the default option), people they follow or only people they mention (using the @ symbol). This improvement has given users extra control, providing them with more protection from trolls and online abuse.

FOSTER CRITICAL THINKING

It can be difficult for anyone to ascertain if something online is real or false, but particularly for young people. Encourage your child to check several reputable sources to determine if a story they've seen is true; remind them to watch out for scams and think about the message's possible motive. Emphasise that it's not a good idea to retweet something if they aren't sure it's correct.

PAUSE BEFORE POSTING

It's important that young people think about what they're about to post and whether they might regret it later. Twitter has developed 'nudges': little prompts which appear if someone is about to tweet using harmful or offensive language. These nudges promote more positive online behaviour by giving users an opportunity to pause and consider their words before they post something.

ENGAGE SAFETY MODE

When Safety Mode is activated, Twitter checks for abusive or spammy behaviour such as hurtful language or repeated negative replies. The platform then flags these suspect accounts and blocks them from responding to your child's tweets. The autoblock function then prevents these accounts from interacting with your child's again for seven days.

BLOCK, REPORT OR MUTE

If someone is upsetting your child on Twitter, you can block and report them. Blocking stops them from messaging or following your child, while reporting an account alerts Twitter to investigate possible misuse. The 'mute' feature, meanwhile, keeps tweets from a specific account (or which include certain words) out of your child's timeline. The other user won't know that they've been muted.

CENSORED

REPORT

MUTE

BE CAREFUL WHO TO FOLLOW

As accounts are no longer being as rigorously verified under the 'blue tick' system, it's essential that young Twitter users understand what this means, in terms of people not necessarily being who they claim. Anyone who your child only knows online is still a stranger, regardless of how long they've been communicating for. Remind your child never to disclose personal information on social media.

What Parents & Carers Need to Know about OF WORLD WARCRAFT

AGE RESTRICTION
12+

WHAT ARE THE RISKS?

ALWAYS ONLINE

World of Warcraft is an MMORPG, which stands for Massively Multiplayer Online Role-Playing Game. Players create a character and head off on mythical quests to earn rewards and become more powerful. The game's environment is absolutely vast, and it can only be played online on PC or Mac – so there's a high probability of young Warcraft fans wanting to monopolise the family computer.

REGULAR EXPANSIONS

As is common with many MMORPGs, World of Warcraft's developers, Blizzard, release regular expansions for the game (usually every 18 months to two years). So although there's still plenty of content for young players to experience right now, there will almost inevitably be a requirement to continue buying future expansion packs, which tend to cost around £50.

IN-GAME PURCHASES AND SUBSCRIPTIONS

Just like its genre contemporary Final Fantasy XIV, World of Warcraft requires a monthly subscription fee to play. It's currently £9.99 per month (although you can get it cheaper by signing up to a longer subscription). There are also many items which can be purchased from the in-game store that don't affect gameplay, but instead offer cosmetic alterations to a player's character.

World of Warcraft originally launched way back in 2004, and since then the game has blossomed into a major entertainment property. It's spawned spin-off novels, merchandise and even a Hollywood movie adaptation – but why are we still talking about it in 2023? World of Warcraft's most recent iteration, Dragonflight, launched last November and marks the game's ninth major expansion. This latest addition has attracted a whole host of lapsed players back to the game – as well as newcomers jumping into the realm of Azeroth for the first time.

VOICE AND TEXT CHAT

Because World of Warcraft is played exclusively on PCs and Macs, it's easy for users to type out text messages if they aren't comfortable using voice chat. If you'll forgive the pun, that's a double-edged sword because – although there's less chance of them being harassed verbally – it puts young players at increased risk of being trolled or receiving spam through the in-game messaging function.

SIMULATED VIOLENCE

The fact that World of Warcraft is almost 20 years old means that even its most violent battles look slightly cartoonish compared with the level of authenticity in many more modern games. The exception tends to be Warcraft's in-game cutscenes: animated sections which move the plot onto the next stage. These offer more realistic visuals, but they still aren't overly gory or scary.

POTENTIAL FOR ADDICTION

World of Warcraft can trigger a powerful "just one more quest" mentality in players (especially young ones) as they rush to secure the next dopamine hit from levelling their character up or earning a new item or weapon. It's also a game that doesn't have a definite end – because as soon as a player finishes levelling up one character, they can start afresh with another one.

Advice for Parents & Carers

MANAGE PLAYTIME

World of Warcraft can be an extremely enjoyable game to play with friends, but it's important that your child doesn't let their adventures crowd out school work, socialising or anything else they also enjoy. You could, for example, consider imposing playtime limits – such as a set number of hours to play Warcraft per week, or restricting it to particular days or just weekends.

MAKE IT A REWARD

If your child is excited about getting the next World of Warcraft expansion, you could consider using it as a reward for completing their weekly tasks (you could even call them "quests"! like tidying their room or doing their homework. This will demonstrate that you're happy for them to play the game but will also help them to build good, productive habits, reinforcing that hard work earns rewards.

SIGN UP FOR THE FREE TRIAL

Warcraft's monthly subscription effectively "pays" for the regular new content, but there's also a sizeable free trial that lets new players explore the world of Azeroth without paying a penny. Players can play up until Level 20 for free, which is easily several hours' worth of gameplay. If your child does take this option, we'd suggest minimising in-game spending by not linking a bank card to their account.

REMEMBER THE AGE RATING

Due to mild violence and the occasional use of offensive language, World of Warcraft has been rated as appropriate for players aged 12 and over by PEGI (the Pan-European Game Information system, which gives games their age certificate). It isn't really suitable for anyone below that age, so you may potentially have to explain this reasoning to your younger children if they want to play it.

ADVENTURE TOGETHER

Warcraft can certainly be addictive, but playing it together is also a great way to spend time with your child. The game's focus on cooperative questing and battling enemies can make it feel like you've accomplished something as a team, and you'll also be in a prime position to spot any early signs of addiction. Just remember to apply gaming time limits to yourself as well as your young ones!

STAY SAFE ON NEW DEVICES

Whether you're an internet newbie or a pro at surfing the web, it's always important to keep online safety in mind. We've pulled together a list of top tips to make it easier for you to protect yourself and your devices in the digital world - helping you steer clear of hazards like misleading information and vicious viruses. There's never a bad time to refresh your internet safety knowledge, but it's an especially smart thing to do before you start using any shiny new devices!

St Mary's Online Safety Tips

Here at St Mary's we consider online safety a priority, we acknowledge that the world our children are preparing for is becoming increasingly online. Therefore, we have compiled the following tips in order to support you in guiding your child through digital experiences.

☐ Set Up Parental Controls

Home internet providers can offer parental controls for your family. There are 2 ways of achieving this:

- Use a filter from your internet provider to control the content that you and your family see. Some providers allow different settings for each user.
- Set up any device connected to your home broadband. How you do this depends on your provider and you'll need to access your home router. You can ask your internet provider for help setting this up.

Check the settings on any games or device that your child is on.

Settings icons usually look like a gear like this:

On some devices you can control the following:

- Turn off chat functions to stop your child from talking to people they don't know
- Restrict games based on age
- Turn off in-game purchases, or set a limit.

An example is shown on the popular game Roblox:

My Settings

2 Step Verification
Improve your account security. A code will be required when you login to...

Email codes when logging in from a new device.
A verified email is required.

What are Account Controls?
You can setup account restrictions on this account to restrict access to a curated content.

Account PIN
Account PIN is currently disabled
When this setting is enabled, the PIN must be provided before changing settings.

Account Restrictions
Account Restrictions are enabled
This account can only access our curated content on the platform. Additionally, contact settings (under the Privacy page) will be set to Off.

My Settings

Privacy Settings

Contact Settings

Custom

Who can message me?
Friends

Who can chat with me in app?
Friends

Who can chat with me?
No one

If you go to settings, then select security you can set a pin, this will control when your child will be able to access the game. You can also enable the account restrictions; this means your child will access content that is more filtered. If you go to privacy settings, disable the chat.

☐ Have devices in a supervised area

Remember that parental control tools are not always 100% effective and sometimes, unsuitable content can get past them, so don't rely on them alone to protect your child.

The best way to ensure your child is safe is to monitor their behaviours online. It is not reasonable to expect young children to regulate their own behaviours online, just as we would not expect it to be reasonable for a child to arrange what they have for dinner each night, we as adults must guide the children in their choices.

Avoid headphones or headsets, unfortunately there is plenty of content that appears to be aimed at children but have inappropriate themes. Remember, just because something is a 'cartoon' doesn't mean it's for children.

☐ Open a Discussion

- Talk to your child and ask them to show or even teach you how they use the internet, learn which websites or tools they like to use and why. Learning together can often open opportunities to discuss safe behaviour with your child.
- Always ensure your child knows how to block or report people online who send nasty or inappropriate messages or content. Encourage your child not to retaliate or reply.
- Make sure your child knows to tell an adult they trust if they see something online that makes them feel scared, worried or uncomfortable. This will only begin with
- Children love talking about games! If you ask them what their mission is, what the game is about or even play a short game with them, you can learn a wealth of knowledge about what your child enjoys online. This will allow you to look it up in your own time to scan whether it is appropriate or safe for your child.
- Discuss the SMART rules listed below for guidance, the children would have been taught these guidelines to follow when online. Support them in understanding them and realising their application.

☐ Learn the SMART rules

S

Safe: Keep safe by being careful not to give out personal information when you're chatting or posting online. Personal information includes your email address, phone number and password.

M

Meet: Meeting someone you have only been in touch with online can be dangerous. Only do so with your parents' or carers' permission and even then only when they can be present. Remember online friends are still strangers even if you have been talking to them for a long time.

A

Accepting: Accepting emails, messages, or opening files, images or texts from people you don't know or trust can lead to problems — they may contain viruses or nasty messages!

R

Reliable: Someone online might lie about who they are and information on the internet may not be true. Always check information you see or hear from the internet or social media.

T

Tell: Tell a parent, carer or a trusted adult if someone, or something, makes you feel uncomfortable or worried, or if you or someone you know is being bullied online.

What Parents & Carers Need to Know about SOCIAL MEDIA & MENTAL HEALTH

An estimated one-third of children have a social media account, so it's important that trusted adults know what content young people are consuming, what they're posting and the interactions they're having. On social media, it can be easy to go down 'rabbit holes' that aren't beneficial to our wellbeing. As platforms grapple with managing such 'legal but harmful' content, lives are being impacted – sometimes to tragic effect. We might be daunted by the scale of the tech giants and their content which so enthralls young people, but we can still help children to be aware of their mental wellness: recognising when something isn't OK... and knowing what to do about content that upsets them.

1. UNDERSTAND THE ALGORITHM

Algorithms rank content by user interest: someone who regularly interacts with sports news, say, will see the latest results at the top of their feed. Likewise, if a user browses content that can cause harm, that's what will be recommended to them in future. Someone who's had a bad day and looks for posts which reflect their mood will find similar content being suggested to them more and more.

2. AVOID THE MAIN FEEDS

Avoiding the default feeds on social media platforms limits the amount of recommended content that's shown. Users can opt to only scroll through the accounts they follow, use restricted modes, or highlight posts that they don't want to see more of. Explore the platform safety settings to see how you can take control of what your child's phone shows them when they open the app.

3. DISCUSS WHAT THEY'VE SEEN

Chatting about what your child's seen online keeps you aware of the content they're interacting with. Don't assume that platforms are screening out inappropriate material, or even that your child would recognise content as being harmful. Discuss who they follow, what posts they like and what comes up in their feeds: if alarm bells ring, it could be time for a more in-depth talk or to seek support.

4. LEARN HOW TO HIDE CONTENT

If your child stumbles across unsuitable content on social media, there's the option to hide that post as well as indicating you'd prefer any similar material not to be suggested in future. On some platforms, you might also be able to block posts that contain specific words, which is an excellent way to start taking control of what your child sees online.

5. SET DAILY LIMITS

Phones and most apps can tell you how much they're being used. Spending too long online can mean a child misses out on other activities that are important to all-round wellbeing. You could set some family rules – for everyone to follow – around device use, such as screen time limits and tech-free spaces: involving your child in creating this agreement makes them more likely to stick to it.

6. MONITOR THEIR ACTIVITY

Keeping a discreet eye on how your child is using social media can help ensure they're not entering potentially dangerous situations. As they grow up, of course, children need space to exercise their independence – but you can still occasionally ask to see what they're looking at. Be transparent about your own social media use and try not to sound judgemental about your child's.

7. TURN OFF PUSH NOTIFICATIONS

Even for adults, it's tempting to check an email or message as soon as the alert sound pings. Push notifications encourage people to open their apps and spend time on their device, so turning them off will help your child to practise mindful use of tech. Most of us have other things that we need to focus on as a priority – and those notifications will still be there later, when we have more time.

8. USE DEVICES TOGETHER

Giving children internet-enabled devices and complete freedom to explore platforms on their own can result in exposure to hugely damaging content. You could consider making a particular area at home a designated space to use phones, tablets and so on – making it much easier to monitor what content your child is viewing and (if necessary) steer them away from any potentially harmful paths.

9. ENCOURAGE OTHER ACTIVITIES

Mental health professionals often highlight the importance of exercise, quality time with loved ones, a balanced diet and restful sleep for our mental wellbeing. Spending hours on social media can cause us to sacrifice other activities that our brains need to feel well – so encouraging your child to put down their phone and enjoy something that doesn't involve a screen can be immensely beneficial.

10. TALK ABOUT PEER PRESSURE

Most platforms default children's accounts to private, so only people they've accepted as friends can see their posts. This reduces the risk of bullying or unkind comments, but – just like offline life – the digital world can still make children feel as if they need to act or look a certain way to fit in. Talk to your child about peer pressure, and listen to any concerns so you can provide the support they need.

What Parents & Carers Need to Know about CALL OF DUTY: MODERN WARFARE II

The Call of Duty (CoD) series is a worldwide gaming phenomenon, with millions of copies sold every year. While 2021's release, Vanguard, wasn't quite as well received, this latest entry – Modern Warfare II – has so far proved a massive commercial success. A sequel to the recent Modern Warfare reboot (and not to be confused with the original Modern Warfare 2, from back in 2009), the game is an online shooter which features – unsurprisingly – extreme violence, rendered in realistic graphics. Amid the explosions and political nature of the plot, there's much for parents to be aware of.

AGE RATING

PEGI
18

WHAT ARE THE RISKS?

VIRTUAL VIOLENCE

Like most of its predecessors in the franchise, Modern Warfare II carries an 18 age rating from PEGI (the Pan-European Gaming Information system, which assesses games' content for suitability). This means players will encounter – according to PEGI's wording – depictions of "gross violence, apparently motiveless killing, or violence towards defenceless characters".

OFFENSIVE CHAT & MESSAGING

Most CoD players are likely to spend the majority of their time on Modern Warfare II in online multiplayer mode. This entails competing against – or cooperating with – strangers on the online battlefield. The fast-paced, cut-throat world of CoD means that communication through the game's voice chat and direct messages often turns heated and aggressive, which may upset younger players.

IN-GAME PURCHASES

Modern Warfare II follows the 'battle pass' model of games like Fortnite. For a fee – usually around £10 – each 'season' (every three months or so), players will be invited to complete extra challenges to earn new weapons and equipment. Different tiers of battle pass (costing more money) enable them to achieve this more quickly, while items can also be purchased from the in-game store.

POLITICAL SENSITIVITY

Previous CoD games have been accused of attempting to "rewrite history": failing to correctly attribute alleged war crimes to the US military, for example. The semi-fictional version of history presented on screen can cause players to misunderstand past conflicts and the real reasons they took place. This could lead to young people developing a distorted, inaccurate view of world politics.

AN ADDICTIVE EXPERIENCE

Multiplayer mode in Call of Duty titles revolves around levelling up your character to unlock new weapons, abilities and equipment. The process is designed so that it doesn't take too long to see an improvement, and the feeling of making meaningful progress can keep players hooked for hours. It's easy for gamers of any age to lose track of time, but younger ones are especially susceptible.

Advice for Parents & Carers

RESPECT THE AGE RATING

Based on accurately recreating combat situations, Call of Duty games are unflinching in their portrayal of war. Limbs are shot off and explosions send gore flying, while the previous Modern Warfare featured a lengthy interrogation and torture sequence. With Modern Warfare II offering the same style of brutal realism, it's worth reiterating that the PEGI 18 age rating is there for a reason.

CLOSE OFF COMMUNICATION

Unless they're playing with their real-life friends, it may be worth closing communication channels if your child plays Modern Warfare II. There's less of a team focus than in many other online combat games and therefore no real need to interact with strangers. Call of Duty fans can be intensely competitive, so even a single action by your child could provoke a barrage of abuse from strangers.

SET SPENDING LIMITS

If your child is likely to be tempted by buying that 'must-have' weapon or item, consider removing your bank details from the console or computer to prevent indiscriminate spending – and an unwelcome bill. Pre-paid cards could be an option for in-game purchases, allowing you to control how much your child can spend in advance – and helping them learn the basics of budgeting.

TRY OTHER MODES

If it seems that your child only ever plays Modern Warfare II in multiplayer, you could try out the Spec Ops mode with them – formulating strategies while enjoying each other's company. You could also play multiplayer together, taking it in turns to ensure regular breaks. Another alternative is the game's campaign mode, featuring bespoke missions and scenarios which follow an overarching plot.

What Parents & Carers Need to Know about

AMIGO

Amigo is a social platform which purports to connect strangers from around the world – and, with built-in translation software, it reduces the expected language barriers. Focusing heavily on one-to-one chat, video calls and live streams, Amigo encourages its users to build up online relationships and unlock exclusive features such as private video and audio calls: essentially, the more that people chat, the more functions become available to them. This is an app designed with mature users very much in mind and is therefore definitely not recommended for children.

AGE RATING
18

WHAT ARE THE RISKS?

ONE-TO-ONE COMMUNICATION

While online chats and livestreaming are a great way to communicate with people that children can trust (such as friends and family), Amigo encourages users to connect with complete strangers and develop a friendship through private chats, calls and videos. This will be a clear red flag for most parents, due to the possibility of a child encountering inappropriate content or an online predator.

INAPPROPRIATE CONTACT

Within minutes of signing up for our trial of Amigo (and without using a profile photo), users of the opposite sex were messaging with suggestive statements such as "You're just my type" and "Let's have fun". While the app's stated intent is to help people build friendships, some users obviously seek to take those relationships in a more mature and amorous direction.

MEMBERSHIP COSTS

Like many apps that are free to download, Amigo's business model is centred on in-app purchases. Users are encouraged to pay for VIP membership – enabling them to send more messages each day and boosting their profile's visibility. People can also buy coins (again, for real money) which allow them to send virtual gifts and further increase the number of messages they can send daily.

LACK OF AGE VERIFICATION

Amigo makes no secret of the fact that it's for people aged 18 or above. There's no age verification, however, so a young person could simply sign up under a false date of birth. The app's algorithm claims to match users of similar ages (making them more compatible), but either the algorithm isn't very reliable, or most users have entered a fake age which doesn't correspond with their profile pic.

REWARDS FOR REPEATED USE

Amigo gifts virtual coins to users if they reply to messages within 10 seconds, while there are also daily rewards for posting comments, sharing a video, getting likes or simply opening the app. It also encourages increasing 'Intimacy Levels' with other users to unlock extra features: once someone's online 'friendship' reaches Intimacy Level 3, they can hold one-to-one video calls with each other.

Advice for Parents & Carers

MONITOR DOWNLOADS

As well as frequent catch-ups with your child about what they've enjoyed doing online, you could consider taking the additional step of physically checking their phone every so often to see which apps they've installed. The safest option could be to enable 'ask to buy' (Apple) or 'purchase approvals' (Android) on their device, meaning your authorisation is needed to download any apps.

RESPECT AGE RESTRICTIONS

Apps have age restrictions for a reason, and Amigo is very definitely a mature content platform. Given that many of Amigo's users apparently use a bogus date of birth, you might want to remind your child about the implications of setting up a fake profile – such as being exposed to messages and videos that make them feel uncomfortable or feeling pressured into chatting with strangers.

BLOCK, REPORT, DISCUSS

Many children already know that connecting with strangers online is dangerous, but it never hurts to refresh their memory. Whatever communication apps your child uses, make sure they're fully aware that if anything online makes them feel uncomfortable, scared or upset, then they can block the user responsible, report the content, take a screenshot as evidence and come to tell you straight away.

ACTIVE LISTENING

If your child does approach you with a concern, make time to stop what you're doing and actively listen. Let them talk without interrupting or showing any judgement, then discuss their options and the possible solutions: this empowers them and reassures them that you're there to be supportive. If the issue is one that has put your child at risk, however, you may wish to contact the police.

What Parents & Carers Need to Know about MINECRAFT

AGE RATING
7+

Minecraft is a beloved classic of modern gaming. First released in 2011, this open-ended 'sandbox' game of building and exploration still has over 140 million players who happily return to play it at least once every month. Minecraft has also been utilised for much more than just entertainment: it's sometimes used in schools to teach children coding, and it's also employed as a tool for computer-aided design, which is another valuable skill. Encouraging creativity and problem solving, Minecraft has plenty to offer gamers of all ages, and it's available on almost all video game platforms.

WHAT ARE THE RISKS?

PUBLIC SERVERS

Joining a public network (called a server) lets your child potentially interact with strangers through text chat. Some servers focus on building, while others are dedicated to role-playing – encouraging direct player interaction. Anyone can join public servers and connecting to one is relatively simple. Public server IP addresses (and therefore someone's location) are easy to find with search engines.

GRIEFING

Some people in Minecraft delight in purposefully damaging or destroying another player's creation. This is called 'griefing' and is a form of bullying: it intentionally spoils someone else's experience in the game by deleting hours of their work and forcing them to start from scratch. Many public servers treat griefing as a severe offence and frequently ban offenders.

ADDICTIVENESS

Minecraft's gameplay is relatively simple, and the outcome (when a child has built something new, for instance) can be extremely gratifying. This can make the game highly addictive. It's easy to lose track of time while playing Minecraft, causing committed young players to forget about other activities like homework or enjoying family time.

SCARY ELEMENTS

The visual design and gameplay of Minecraft is purposefully child friendly, so there's nothing too untoward in the game. However, some of the 'baddies' that can be encountered might prove a little too scary for very young players. In the game, certain enemies come out at night and are accompanied by audio – such as zombie moans and skeleton bone rattles – that may unsettle young ones.

ADDITIONAL PURCHASES

After initially buying the game, players can make optional extra purchases for cosmetic items and other bonuses. Minecraft Realms is an optional online subscription (requiring regular payments) that lets users run a multiplayer server to play with their friends. Most games consoles also need an active subscription to enable online play – so online gaming can quickly become an expensive hobby.

Advice for Parents & Carers

RESEARCH CONTENT CREATORS

There are a lots of Minecraft content creators who release helpful videos about the game on YouTube and Twitch. Not all of these, however, are suitable for children. Watching these content creators' channels yourself first is a safe way to find appropriate Minecraft videos to share with your children. This also helps you learn more about the game itself, and how your child plays it.

CHOOSE THE RIGHT MODE

Selecting 'Creative' or 'Peaceful' mode allows children to play Minecraft without having to contend with enemies. It's also a great way for you to get used to playing the game with them, since the difficulty level is lower. This allows you to work together on a long-term project, creating something special without the threat of moaning zombies or creepers damaging your build.

HOST A PRIVATE SERVER

The easiest way to find a safe server for your child to play on is to make one yourself. Hosting a server prevents strangers from finding it, unless they've been given the necessary joining details. A private server also lets you control who's allowed to enter and – if necessary – to ban someone who shouldn't be there. This is the closest equivalent to parental controls in Minecraft.

ENCOURAGE BREAKS

It's easy for the hours to fly by while your child is playing Minecraft, so reminding them to take regular breaks is essential. This is a useful way for them to learn good time management, which they'll benefit from as they get older. It will also teach them to play their favourite games in moderation – limiting addictive behaviour and allowing them to manage their day better.

TALK ABOUT STRANGERS

At some point in their lives, almost everyone needs to have contact with a stranger online. Talking to your child about online safety, therefore, is essential – as is having a plan in place for dealing with any hostile or difficult strangers. Ensure that your child knows never to tell a stranger about themselves online, and that they should come to you straight away if they do encounter a problem.
